Office Action Summary

Art Unit: 1714

DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11 and 15-30, drawn to a composition comprising a resin and solvent(s) and a method of making thereof, classified in class 524, subclass 86+.
- II. Claims 12-14, drawn to a water-based polyurethane foaming composition comprising polyurethane reactants, classified in class 521, subclass 50+.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination recites a generic resin and various resins other than polyurethane. The subcombination has separate utility such as a composition for making polyurethane-acrylate.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Nauman on April 11, 2001 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1714

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tae H. Yoon whose telephone number is (703) 308-2389. The examiner can normally be reached on Monday to Thursday from 8:00 to 5:30.
